

Alloy wheel rims

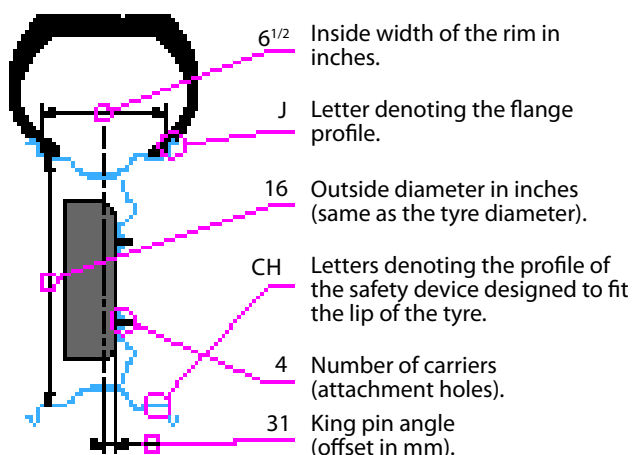

Peugeot 2008-2009 range

Lexicon

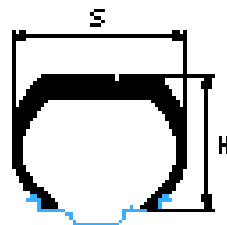

HOW TO READ THE DIMENSIONS GIVEN ON THE WHEEL RIM?

FOR EXAMPLE: 6^{1/2} J 16 CH4.31

HOW TO READ THE MARKINGS ON A TYRE?

FOR EXAMPLE: 205/55 R 16

205 - Tyre section width (S).

55 - Tyre series (H/S = 55).

R - Radial structure or speed index.

16 - Tyre inside diameter in inches (same as the rim diameter).

WHAT DO THE NUMBERS AFTER THE MARKINGS MEAN (THE NUMBERS IN WINDOWS)?

FOR EXAMPLE: 91 V

The number is the load index: the maximum load authorised by the tyre, ranging from 65 (290kg) to 124 (1600kg).

The letter is the maximum speed not to be exceeded, ranging from Q (160 km/h) to ZR(Y) (> 300 km/h).

Your car really does have style!

With the new 2008-2009 range of « alloy wheel rims » your Peugeot will have even more style.

Peugeot has always combined passion and inspiration to bring you personalised innovative solutions. Between the quality of its road-holding and the stringent demands of our validations, it is not surprising that Peugeot is one of the safest bets on the automobile market.

All our alloy wheel rims have been designed by our design offices at the same time as the vehicles with which they are presented, thus providing an excellent technical synthesis between the car and its wheels. That is why we can guarantee you a pleasant and dynamic drive, optimized for greater comfort and safety.

To this end, the Peugeot wheel rims are covered by all the approvals granted to our cars under the European regulatory requirements applicable to private vehicles. (Directive 70/200/EC*2001/116/EC)

It is thanks to the fact that Peugeot has never left the quality of its designs to chance that their reliability is widely acknowledged. Making precision rhyme with quality - these are the secret ingredients of trust!

Are you entranced by your Peugeot? Then you will not be able to resist our alloy wheel rims. Let yourself be seduced by our models, personalise the style of your car.
